**G 10**

I would have to say I disagree, with the opinion that all Americans, both men and women, should be required to perform two years of military service.

The women have there own job to do like cleaning the house, taking care of the kids, cooking the food. If the women go to war with the men, how would they keep there house clean, and how would they cook the food.

Another thing is if and when the men get hurt who is going to make them better? Nurses. The women have to be nurses, because they are the one's who are supost to take care of everyone. Besides men can't have kids.

I don't even belive in anyone trying to start a war. I think fighting is not the way you should get what you want. If some people would just ask or try to trade some thing you could find a way of getting what you want.

So with all that said No women should not go to war or any military service. They should stay at home, and do things they know how to do.

**Score Point: 3**

This response reflects limited proficiency in persuasive writing skills. The writer clearly opposes requiring all Americans, both men and women, from serving two years in the military. The writer's primary support of this position is the inadvisability of having women serve; however, the response loses focus as the writer describes an overall opposition to war. An organizational structure is evident, but the introduction and the conclusion are weak. Further development and a more controlled focus would be required for a higher score.
